Multicolor Elements in attached 45 (65) Advance Copy

1. In connection with your memo of 23 December to D/Pub on above subject, it is a little late to suggest that it would be very irresponsible to print this section before a number of basic factors are weighed. It is already printed and ready to go. Your questions should have been raised at the page proof stage as the proofs indicated clearly the color scheme for these charts. To withdraw the pages now for a reprint job would only increase the cost and delay distribution which I do not think is warranted.

2. Whether the color charts are to be continued or not can be determined upon KAK's return. In any event, I can see no earthshaking consequences of putting out this section with the charts "as is." I have, therefore, instructed to proceed accordingly.
